

**argenx has a committed field team designed to provide educational support for healthcare providers (HCPs) and their offices to facilitate patient access to argenx products.**

Our dedicated and experienced team of Field Reimbursement Managers (FRMs) can provide education and support access & reimbursement for argenx products within your region.

## Access and Reimbursement Education

**FRMs can provide general access & reimbursement education to HCPs and offices, including:**

- Benefits investigation, prior authorization (PA), and appeals processes
- Billing, coding, and claims submission processes
- Reimbursement and cost considerations
- Product acquisition
- Site-of-care requirements

## Case-Specific Support\*

**FRMs can provide case-specific support to assist in getting patients on treatment, including:**

- Review payer-specific policy information, PA criteria, step-edit requirements, and required documentation for claims submission
- Provide educational resources and sample forms/letters to assist with PA or appeal submissions
- Assist in addressing billing & coding, reimbursement, or other access barriers
- Identify and coordinate site-of-care options based on patients' insurance coverage

## Patient Support

**FRMs can provide coordination and education through a suite of patient support services available via My VYVGART Path, including:**

- Assist with enrolling your patients with My VYVGART Path
- Provide information on financial assistance programs, including co-pay assistance programs
- Help you access additional patient support resources

Phone Number:

\*Case-specific support is limited to patients enrolled in My VYVGART Path.

argenx's team of dedicated field clinical educators (FCEs) plays a key role in providing educational support to prescribers and clinical staff.

FCEs are **registered nurses** with extensive backgrounds in patient care who can provide education on argenx products as well as disease state education.

## Healthcare Provider Education

FCEs can provide product and disease state education to healthcare providers (HCPs) and offices, including:

### *Product education*

- Dosing and administration instructions, including injection demonstrations
- Product storage and preparation
- Considerations for starting patients on therapy
- Efficacy and safety
- Setting clinical expectations with patients

### *Disease State Education*

- Signs and symptoms
- Patient impact
- Symptom monitoring

## Patient Education\*

FCEs are able to provide patients with personalized support and access to resources to assist them through all steps of their treatment journey, including:

- Explaining how argenx products work
- Setting treatment expectations and determining a treatment plan
- Explaining dosing and administration
- Tools to help with symptom tracking
- Connection to other helpful resources
